Open Science Office
made permanent
(President's Office)

Education and Training

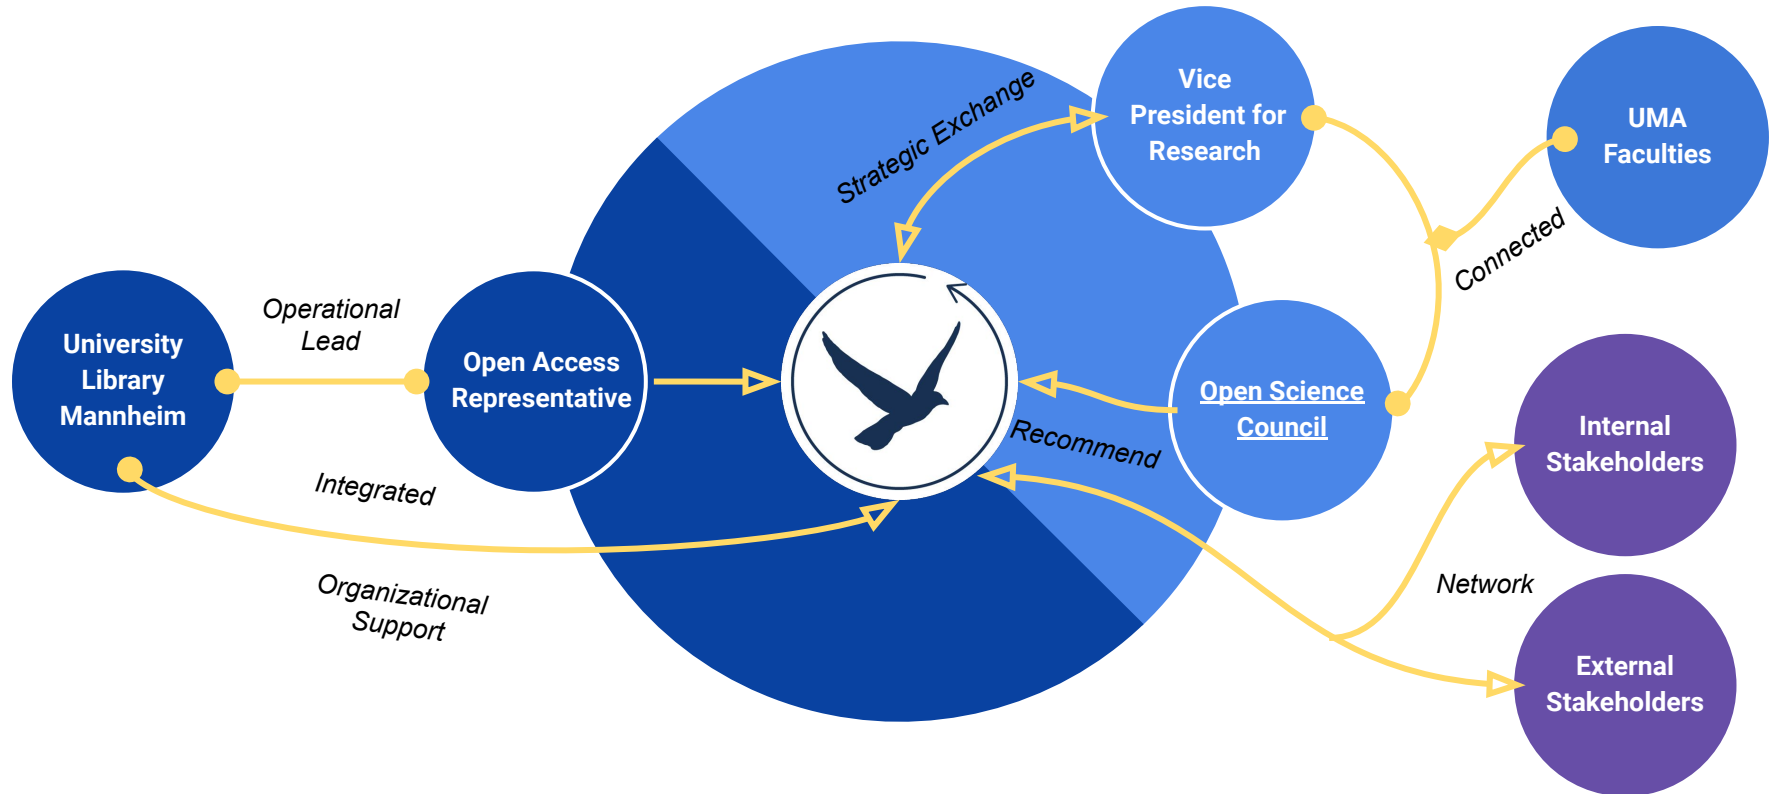

Research Support

Networking and Outreach

Structure of the Open Science Office

Delivering the Open Science Office

Delivering the Open Science Office

Training and Educating Researchers:

Provides and organises:

- Open Science seminars and workshops
- (an) Open Science Summer School
- Lectures on faculties' courses

Open Access, Open Data and Open
Research Practices

Preregistrations and Registered
Reports

Technical Workflows for
Reproducibility (e.g., R Markdown
and Docker)

Citizen Science

Delivering the Open Science Office

Research Support and Services:

Open Science consultations (e.g., for **DFG**, **BW-Stiftung**, or **EU** funding applications)

Open Science Grants (up to 6,500 EURs).

funded by
Open Science Office

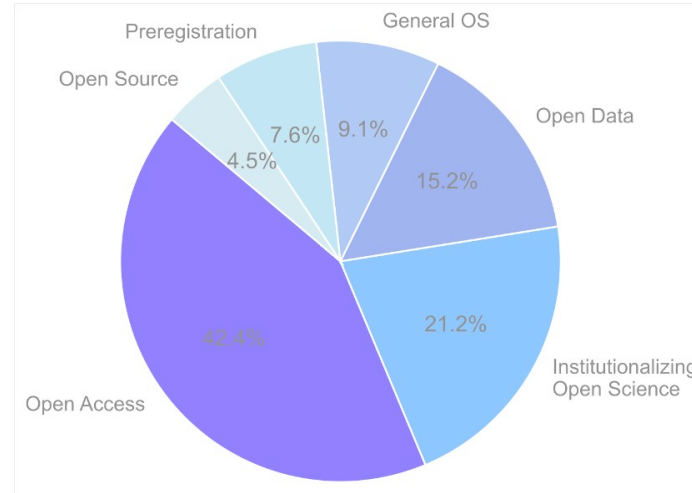

Delivering the Open Science Office

Networking and Outreach:

The Open Science Office also works internally and externally with stakeholders:

Evaluating and Assessing the Impact of the Open Science Office

Impact Report 2021- 2023

Self-evaluation of the Open Science Office:

- Quantitative Outcomes (e.g., no. hours training, deliverables from Open Science Grants)
- Qualitative Outcomes (e.g., case studies and feedback)

“This paper would not have existed without this programme. This is a unique opportunity, especially for doctoral students, to carry out clean and replicable research without being financially dependent on their supervisors” - Open Science Grant 2021 Awardee

Impact Report 2021–2023
Open Science Office of the University of Mannheim

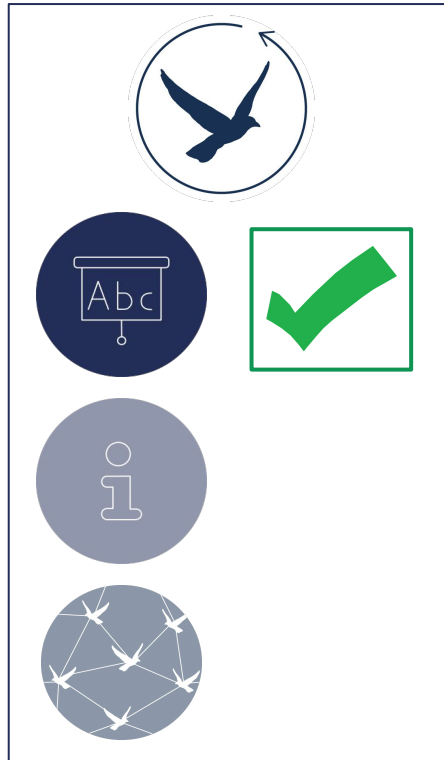

Report compiled by
David Philip Morgan Philipp Zumstein

Last modified: October 20, 2023

Summary: Impact Report 2021- 2023

Summary: Impact Report 2021- 2023

The Open Science Office has provided over 70 hours of training and educational opportunities to almost 600 individuals since 2021.

Summary: Impact Report 2021- 2023

The Open Science Office has provided over 70 hours of training and educational opportunities to almost 600 individuals since 2021.

Beyond training and education, the Open Science Office has provided over 60 Open Science consultations since 2022. 12 projects have been awarded Open Science Grants and of the 6 that have been completed, over 100 deliverables have been produced.

Summary: Impact Report 2021- 2023

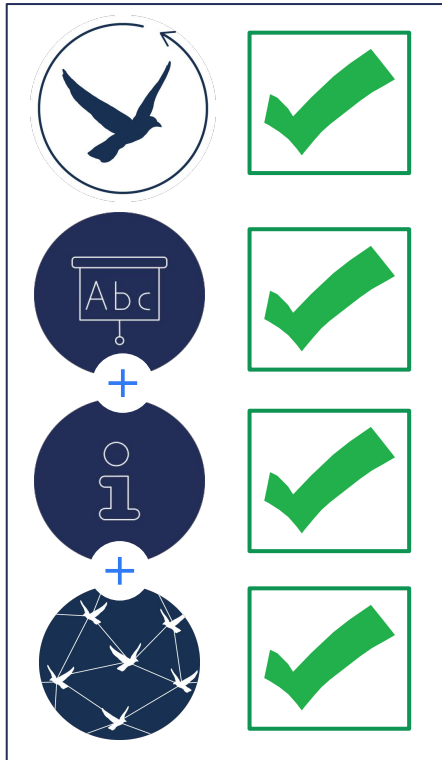

The Open Science Office has provided over 70 hours of training and educational opportunities to almost 600 individuals since 2021.

Beyond training and education, the Open Science Office has provided over 60 Open Science consultations since 2022 12 projects have been awarded Open Science Grants and of the 6 that have been completed, over 100 deliverables have been produced.

The university's approach has been presented at 6 conferences and 3 publications have been written while simultaneously working with administrative and research departments within the university.

Summary: Impact Report 2021- 2023

The Open Science Office has provided over 70 hours of training and educational opportunities to almost 600 individuals since 2021.

Beyond that, the Open Science Office has provided 12 projects and 6 that have produced 2022 results and of the 1000s that have been

Overall, the Open Science Office achieved *impact in all evaluation dimensions*. It implements and advances the strategic goals of the University of Mannheim regarding Open Science.

The university has been working with administrative and research departments in the university.

Lessons Learned from the University of Mannheim

The library as a Hub for Open Science

Other Lessons Learned

Measuring the Impact of an Open Science Office is difficult:

- Comparison between researchers who did not have access to the Open Science Office and those who did may be needed to measure *impact*.
- Simple quantitative metrics (e.g. number of pre-registrations) may ignore the qualitative aspects (i.e. how good are those pre-registrations)
- Agreeing on evaluation dimensions ahead of time is therefore fundamental so that expectations are clear

Navigating University Leadership Structures:

- Advocating constantly on different levels (without preaching)
- Convince with a spectrum of arguments
- Prepared for challenging and recurring questions (change management)
- Understand the decision processes in your university
- Have strong support from library/university leadership

Thank you for Listening. Questions?
